Thank you for your interest in DNV GL - Business Assurance events. FSSC 22000 published its newly developed Version 5 of the FSSC 22000 certification program. Now available on the FSSC 22000 website, this new edition incorporates all the revisions of the ISO 22000 standard, which was published in June 2018. The revision of ISO 22000, therefore, has a major impact on the certification program. These changes, and how they might help companies to better focus on their operational risks, introduce efficiencies into their food safety management system and work towards compliance, will be explained in this webinar. In conjunction with these updates to the standard, DNV GL is offering a FSMS Lead Auditor training course in September in Oxnard, CA. Please get more information and register for the training. Page 2 Thank you for your interest in DNV GL - Business Assurance events. FSSC 22000 is a food safety management system certification based on the ISO 22000 family of standards. In May of this year, the Foundation FSSC 22000 website, this new edition incorporates all the revisions of the ISO 22000 standard, which was published in June 2018. The revision of ISO 22000, therefore, has a major impact on the certification program. These changes, and how they might help companies to better focus on their operational and organizational risks, introduce efficiencies into their food safety management system and work towards compliance, will be explained in this webinar. In conjunction with these updates to the standard, DNV GL is offering a FSMS Lead Auditor training course in September in Kansas City, MO and in November in Oxnard, CA. Please get more information and register for the training company for certification documents, system training, and management training, Quality, Environmental, OH&S, ISMS, HSE certification, Hospital accreditation, Laboratory accreditation, Laboratory accreditation improve systematic and proactive approach to identification of food safety Management System (FSMS) and ISO 22000:2018 Certification improve systematic and proactive approach to identification, certification, certification, training and documentation. We help food organizations to develop a comprehensive model for food management system that can make any competitive. Many organizations to have an edge over their competitive. Many organizations to develop a comprehensive model for food management system that can make any competitive. Many organizations to develop a comprehensive model for food management system that can make any competitive. Many organizations to develop a comprehensive model for food management system that can make any competitive. Advantages of ISO 22000:2018 Certification Systematic approach to food safety and proactive approach to identification of food safety hazards. Proactive preventative management systems (QMS) and meets HACCP codex guidelines. Can be integrated with QMS. Internationally recognized approach. Fewer rejections. Cost effectiveness. Increased confidence / customer satisfaction. Risk management tool. Brand protection. Provides potential for harmonization of HACCP concepts internationally. C105 - ISO 22000:2018 Auditor Training PPT Presentation Kit - \$ 450 We offer ISO 22000:2018 Awareness and Auditor Training presentation kit, which is prepared by a team of highly-qualified management professionals and experienced food safety consultants. This food system auditor training presentation slides are very useful while conducting corporate training within the organization or any work area. Our many clients have used it to train their employees during ISO 22000 certification. Our custom-designed PowerPoint presentation meets the requirements of effective food safety management system auditor training kit contains more than 260 ppt slides. This ISO 22000 awareness training kit comprises two parts as mentioned below: Part A: Presentation Topic-wise ISO 22000 Auditor Training presentation kit contains following 7 modules: Overview of Food safety management System Audit. ISO 22000:2018 Internal Audit Records Introduction to HACCP Workshop and casestudy to evaluate internal auditor training. TQCSI FSSC Harmonisation Training - 2017 TQCSI FSSC Harmonisation Traini undertaken during each FSSC three year certification cycle FSSC certified organizations are expected to be ready for an audit at any time. TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisat responsibility within the management team for food safety and compliance with all Scheme requirements relevant deputies replacing any absentees must be available to assist in providing information required to facilitate the audit. TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Training – 2017 30 Consequences If the following functions are not present during an unannounced audit, a Follow-Up Audit is required (can be conducted off-site): • top management • human resources • outsourced supporting services • outsour responsibility. TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Training an announced Follow-Up Audit. TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Training – 2017 TQCSI to verify the unannounced audits Audit Team Leaders should have audited the clients before Audit Team Leaders must identify themselves and the Audit Team Who will conduct the unannounced audit clients may contact TQCSI to verify the unannounced audit. TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Training – 2017 33 Case Study A – Unannounced Audits day and the other person has called-in sick that morning Question 1. How does the auditor deal with this situation? TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Training – 2017 34 Case Study A – Unannounced AuditsSituation #2 Audits are to cover all processes of the scope of the certification - where possible, the widest range of should be in products with fruit - on the day of the audit, the product lines for pineapple juice and milk products with fruit were not in products with fruit - on the day of the audit, the product lines for pineapple juice and milk products with fruit were not in products with fruit - on the day of the audit, the product lines for pineapple juice is a product that is only produced on demand of the client - the milk products with fruit AuditsSituation #3 the auditor assigned to conduct the unannounced audit has not audited the company's OA Manager. Question 4. Is this allowed? TOCSI FSSC Harmonisation Training - 2017 TOCSI FSSC Harmo Case Study B – Nonconformity GradingThe criteria for nonconformity grading is described in Part 4, Annex 3. TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Training – 2017 37 Case Study B – Nonconformity GradingSituation #4 an organization based in the Ibaraki area, some distance from Tokyo, is producing really nice sushi and sashimi products for Aeon, one of the major Japanese food retailers while the auditor is doing the walk around the manufacturing facility, she has been told by one of the production lines just underwent maintenance the weekend before as a result, she observes that one of the production lines just underwent maintenance the weekend before as a result, she observes that there is fluid dripping into open product on one of the production lines just underwent maintenance the weekend before as a result, she observes that there is fluid dripping into open product on one of the production lines just underwent maintenance the weekend before as a result, she observes that one of the production lines just underwent maintenance the weekend before as a result, she observes that one of the production lines just underwent maintenance the weekend before as a result, she observes that one of the production lines just underwent maintenance the weekend before as a result, she observes that there is fluid dripping into open product on one of the production lines just underwent maintenance the weekend before as a result, she observes that there is fluid dripping into open product on one of the production lines just underwent maintenance the weekend before as a result, she observes that there is fluid dripping into open product on one of the production lines just underwent maintenance the weekend before a supplied to the product of the production lines just underwent maintenance the weekend before a supplied to the product of the product o machine has stopped running. TQCSI FSSC Harmonisation Training – 2017 TQCSI FS the product Question 5. Does this situation constitute a nonconformity and, if yes, what grade? TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisatio organization has previously been audited and certified for its allergen management program by the SimplyOK Scheme however, during the audit, the dispatch area is visited to understand the process of packing and shipping of products and it is observed by the auditor that the product labelling of allergens is not in bold letters which is required by the country's law Question 6: Does this situation constitute a nonconformity, and if yes, what grade? TOCSI FSSC Harmonisation Training - 2017 TOCSI FSSC Harmonisation Training - 2017 40 Case Study C - Food Defence & Food fraud prevention. TOCSI FSSC Harmonisation Training - 2017 40 Case Study C - Food Defence & Food fraud prevention. 2017 TQCSI FSSC Harmonisation Training – 2017 41 Case Study C – Food Defence & Fraud FraudSituation #6 client X is an organization that transports and stores various bulk liquids a risk assessment tool client X has changed its food safety policy to include senior management commitment to food fraud prevention but other FSMS policies, procedures and activities are yet to be updated to include food defence and food fraud prevention TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Traini seals upon arrival and sealed prior to delivery to customers. Question 7 - What evidence does the auditor need to verify in order to audit full compliance? TQCSI FSSC Harmonisation Training – 2017 43 Case Study D – Off-Site Activities The criteria for certification of off-site activities are described in Part 4 of FSSC (Version 4.1), Section 7. TOCSI FSSC Harmonisation Training - 2017 TOCSI FSSC Harmonisation Training - 2017 TOCSI FSSC Harmonisation Training - 2017 44 Case Study D - Off-Site Activities Situation #7 client X is a producer of different flavours of soft drinks are sent in cans to another site, a co-packer, where the cans are sorted and packed as a 'variety pack' with cans of various flavours - these variety packs are brought back to the plant warehouses, and then dispatched as any other finished product the co-packer is also contracted to other producers, but client X is one of their major customers. Question 8. Would it be allowed to certify the external packaging as off-site activities, under client X's FSSC certification scope? TOCSI FSSC Harmonisation Training – 2017 TOCSI FSSC Harmonisation Training – 2017 45 Case Study E – Audit Time Calculation Applicable to Regional Offices only The criteria for calculation Training – 2017 TQCSI FSSC Harmonisation Training – 2017 46 Case Study E – Audit Time Calculation #8 (ROs only) company 'Spicy Herb' has a production plant with 5 employees (5 FTE) the only process is thermal treatment and packaging of berries, spices, herbs, nuts and tea leaves the company wants to know whether is it possible to reduce this on- site audit time, because they are a small organization with only 1 HACCP study. TQCSI FSSC Harmonisation Training - 2017 TQCSI FSSC Harmonisation Train possible to reduce the on-site audit time for the company, and if yes, what would be the reduced on-site audit time (refer WI 54)? TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Trai Training – 2017 TQCSI FSSC Harmonisation Training – 2017 49 Case Study F – Scope Statements...cont.Question 11. Determine for each of the below scope statements whether these would be approved or not, and why: A). Manufacturing of fruit yoghurt. Manufacturing of strawberry yoghurt. Manufacturing of peach yoghurt. B). The manufacturing of disposable chopsticks and paper trays for the serving of food. C). The Manufacturing and Warehousing of Peracetic Acid grades for use as: (1) Antimicrobial agent for processing Meat, Poultry, Seafood, Fruit, and Vegetables and (2) Disinfectant/Anti-Microbial agent for use on beverage packaging materials. D). Production of organic mint tea. TQCSI FSSC Harmonisation Training – 2017 TQCSI FSSC Harmonisation Training – 2017 50 Case Study F – Scope StatementsSituation #9 a warehouse receives frozen pastry, these products are stored at -18 degrees C and thawed one day before transported to retail Question 12. Which PRP(s) applies/apply to this organization with one audit? TQCSI FSSC Harmonisation Training - 2017 TQCSI FSSC Harmonisation Training - 2 Fraud & Food Defence D - Off-site Activities E - Audit Time Calculation F - Scope Statements.
